

**CORRECTED 01Jun25 HL3D Ifavg>csv is now Ifavg ver 2.8 Compatible**

**All files starting with the filename "background... \*.txt" will be excluded from processing**

```
filteredListing = (ArrayList<String>)listing.stream()
    .filter(name -> name.endsWith(".txt"))
    .filter(name -> !name.startsWith("background"))
```

=====

Known Bugs JA\_IFAvg2csv\_varMXB\_intLogo\_11Jan2501.jar 12 May 2025

The **Version 2.8 release of IF\_average** allows for the saving of **Background Correction** Files.

These do not conform to the format for saved **Data Files**.

THUS :

The current software version : JA\_IFAvg2csv\_varMXB\_intLogo\_11Jan2501.jar

Will not properly exclude these and hang the process.

Please Move Any Background Correction Files to another Folder before Processing.

---

---

Also be aware :

**IF\_average : a Folder for Saving Files must be Pre-Defined.**

**Failure to do so, upon attempting to save Multiple Files will cause AirSpy SDR# to crash**
